

MOHAMED ALAA

SOFTWARE ENGINEER

Istanbul ,Turkey | [LinkedIn](#) | [Gmail](#) | [Github](#)

+905011387764

Motivated Software Engineering student with hands-on experience in full-stack web development and a strong foundation in object-oriented programming and backend development. Demonstrated ability to design, develop, and deploy complete software solutions through academic and personal projects. **Eager to learn modern technologies** and contribute to **innovative software products** in a collaborative team environment.

PROJECTS

NATIVE CLOTHIERS

[WEB-SITE](#)

A responsive and modern web application built using Next.js and TypeScript. The project was bootstrapped with create-next-app and focuses on clean design, performance optimization, and scalability. It incorporates CSS and JavaScript for enhanced interactivity and styling, and utilizes the next/font module to optimize font loading with the Geist font family.

Key Technologies:

Next.js, TypeScript, JavaScript, CSS, next/font.

TASK MANAGER

[Full-Stack Web Application](#)

A simple task management web application built with Node.js and Express.js. The project features a clear file structure with a backend server (server.js) and a frontend served through static files. It enables users to manage tasks efficiently through a browser interface. Deployed on Glitch for easy access and testing.

Key Technologies:

Node.js, Express.js, HTML, CSS, JavaScript

Project Structure Highlights:

- server.js: Handles server logic and routing
- public/: Contains static frontend assets
- data/: Stores task-related data
- package.json: Manages dependencies and project scripts

STUDENT MANAGEMENT

[STUDENT MANAGEMENT SYSTEM](#)

A console-based application developed in Java to manage student records and their associated courses. The system supports full CRUD operations, persistent binary file storage, and object-oriented design principles including inheritance and abstraction for flexible data handling.

Key Features:

- ❑ **Student & Course Management:** Create, search, update, and delete students with unique IDs and associated courses.
 - ❑ **Binary File Storage:** Efficient reading/writing of student data using FileInputStream and FileOutputStream.
 - ❑ **Menu-Driven Interface:** Interactive console menu for easy navigation and operations.
 - ❑ **Data Transfer Abstraction:** Uses an abstract DataTransfer class with Email and ToFile subclasses to simulate multiple data export options.
-

EDUCATION

BACHELOR OF ENGINEERING IN SOFTWARE ENGINEERING

Istanbul Atlas University – Istanbul, Turkey

JUNE 2027

- Comprehensive study of software development principles, including object-oriented programming, data structures, algorithms, and system architecture Engaged in academic projects using Java, C, and full-stack web technologies.
- Gained hands-on experience with programming languages such as Java, C, and JavaScript through both coursework and projects.
- Developed academic projects including a student management system in Java and full-stack web applications using Node.js and Next.js.
- Built a solid understanding of operating systems, networking protocols, and database design.
- Applied theoretical knowledge in real-world projects involving problem-solving, system analysis, and efficient coding practices.
- Relevant coursework:
 - **Operating Systems:** Process management, memory handling, file systems
 - **Computer Networking:** OSI model, TCP/IP, socket programming
 - **AI Modeling:** Introduction to machine learning, logic-based AI, basic modeling techniques
 - **Data Structures & Algorithms:** Linked lists, trees, sorting, searching algorithms
 - **Web Development:** Frontend and backend development using modern frameworks
 - **Software Engineering Principles:** Agile methodology, software lifecycle, requirement analysis

SKILLS

- | | |
|--------------------------------|--------------------|
| • JavaScript | • Java |
| • Rest APIs | • Node.js |
| • Express.js & Next.js | • SQL |
| • Problem Solving & Algorithms | • Machine learning |
| • Git & Github | • MongoDB Database |

LANGUAGE

- English B2+
- Arabic Native
- Turkish A2
